

Project Report from the year 2014 in the subject Engineering - Robotics, grade: 69%, University of Huddersfield, course: Computer Science, language: English, abstract: This project is about an arithmetic/mathematic chatbot (a chatbot is an artificial intelligence dialog system or an application that communicates with users and tries to deceive the users like it is human) that helps users with mathematical questions by answering questions that has been asked by a user through a textual method. The Chatbot will be produced as a computer application with a huge support of wolfram alpha and pandorabot that provides answers to the queries entered by users. The product is mostly centred for people within the age of 10 to 50 who are interested in knowing more about a mathematical problem.
