

El libro de Darwin introdujo la teoria cientifica de que las poblaciones evolucionan durante el transcurso de las generaciones mediante un proceso conocido como seleccion natural. Presento pruebas de que la diversidad de la vida surgio de la descendencia comun a traves de un patron ramificado de evolucion. Darwin incluyo las pruebas que reunio en su expedicion en el viaje del Beagle en la decada de 1830 y sus descubrimientos posteriores mediante la investigacion, la correspondencia y la experimentacion. Darwins book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection. It presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution. Darwin included evidence that he had gathered on the Beagle expedition in the 1830s and his subsequent findings from research, correspondence, and experimentation.
