

This book explores theoretical and practical implications of reflecting the fair value of liabilities for insurance companies. In addition, the contributions discuss the disclosure of these values to the financial and regulatory communities and auditing firms which are actually calculating this illusive but important variable. It combines contributions by distinguished practitioners from the insurance, accounting and finance fields, with those of prominent academics. One of the central themes of the collection is that adequate disclosure of the true economic value of insurance company liabilities is both possible and desirable. Wherever possible, the insurance valuation process is wedded with modern financial theory. For example, the use of option pricing theory is applied to insurance companies, where the true value of the firms liabilities is a critical variable. Methods such as cash flow, earned profit and indirect discount are explored.

The Watcher: Book One of The Watcher Saga, The Best Book of Rugby Songs Ever!, Turning Wood, Busted Life Inside the Great Mortgage Meltdown, Life Without the Bs: Rants, Raves and Other Crazy Stuff, Prometheus, S.99: Full Score [A1645], Counting My Blessings: Francis Brennans Guide to Happiness, Hispanic-American Writers (Blooms Modern Critical Views), Companion to the Constitution: Polity for the Local Church, Nine Day Novel-Writing: 10K a Day, How to Write a Novel in 9 Days, Structuring Your Novel For Speed (9 Day Novel) (Volume 1),
