

The Science of Occupational Health is an evidence-based resource for all members of the health care team working with those affected by work-based stress. The authors offer a unique psychobiological perspective, discussing the modern workplace as a cause of stimulation and well-being, as well as of distress and illness. They provide a rigorous but highly accessible scientific account of the effects that stress has on mind and body, with key chapters on Responses to Stress, Stress-Related Health Problems, and Stress Hormones at Work.
