

A supplemental manual/reference for all courses in Sociology, from introductory to advanced, involving the research and writing of papers. Perfect complement to any distance learning course. THE most comprehensive book available that deals specifically with writing sociology papers, this reference/manual helps both beginning and advanced students learn (1) how to research and write in sociology, and (2) how to improve their writing ability in general. Based on the author's extensive experience in teaching a variety of sociology courses, it combines the latest sociology research and writing techniques with a broad spectrum of writing activities. It gives specific directions for writing a variety of papers in sociology--from introductory to advanced--while also providing instructions on how to write and how to format the paper and cite sources following the American Sociological Association's guidelines. The manual relieves professors from having to teach much of the detail in the writing process, and gives students the guidance they need to tackle course projects of all complexities.
